Detail Introduction :

Vertical/Horizontal Biscuit Laminator

For Hard biscuit production, sheeting the dough with overlapping functional.

1. Upper carriage, conveyer of upper carriage, lower carriage, conveyer of lower carriage and cutter adopt high precision Schneider Servo motor or other brands of imported Servo motor.
 2. Dynamic type adjust dough sheet thickness, adopting Germany BALLUFF precision distance I sensor to detect the dough sheet thickness, and adjust the dough sheet thickness according to the data output; having mechanical type and software type protection.
 3. Quantity of cutting sheet laminating is 8-12layers
 4. Cutting sheet device controlled by pneumatic device and cutting position adjustable
 5. With SIEMENS touch screen
 6. Equipped with emergency stop switch
- Equip with the hard biscuit sheeting and roller cutting machine.
