Detail Introduction :

Gummy Moving Cart

Product Description

The gummy moving cart is a part of the Gummy Machine, and trays are a necessary device for gummy candy drying processing.

The gummy moving carts are made of SUS304 materials include all components such as wheel and bolts, etc. Every gummy moving cart can place about 50 pieces of trays. Full welding structure makes the carts are strong enough without sanitary risk, easy to cleaning and freely movable.

The gummy trays are made of PP materials and size is 820x400x88mm, there are holes in the trays body so once the trays are stacked and placed in the drying room the moisture and air can flow easily from every layer.
