

300-500kg/h Full Automation Hard Candy Maker Machine

Specifications :

Payment Terms	L/C T/T Western Union
Keyword	hard candy equipment,hard candy maker machine,,hard candy press machine

Detail Introduction :

Hard Candy Maker Machine

Hard Candy Equipment was introduced and developed in recent years as people's consumption level has increased and the demand for candy taste is developing towards mouthfeel, low sugar, multi-color, nutrition, and health. It can produce high-quality hard candy without much human control, which greatly reduces the production cost of enterprises.

Small Hard Candy Making Machine Price and performance.

1. It is an advanced hard candy-making machine, integrating machine, electricity, gas, and control in one, with compact and reasonable structure, high automation, and high production efficiency.
2. Equipped with a self-developed automatic plunger system, it can realize the fully automatic operation of the whole line. The accuracy of the automatic plunger system can reach more than 99%, and after many improvements, the operation is more simple and convenient.
3. It can replace the mold and part of the equipment interchangeably.
4. Production of hard candy quality assurance, large output at a favorable price.
5. Various molds, processes, and recipes can produce hard candy of different shapes and flavors, sandwich hard candy, lollipop, etc.

Features and Uses of Hard Candy Maker Machine.

Features and Uses of Hard Candy Maker Machine.

- 1 It is mainly used in candy processing enterprises, candy processing factories, food processing factories, candy and cookie processing factories, large shopping malls, candy stores, etc.
 - 2 It can be used for the production of hard candy, sandwich candy, lollipop, shortening candy, etc.
- Features Compact structure, good performance, easy operation, high production efficiency, can use different shapes and sizes of molds to produce various shapes of candies.

Composition structure of Hard Candy Making Machine.

The component structure of Hard Candy Making Machine.

- 1 Dynamic flavor and color mixing system
- 2 Oil spraying system
- 3 Waste discharge system
- 4 Touch screen control system
- 5 Cooling tunnel
- 6 Servo sedimentation system

Differences between Hard Candy Making Equipment and conventional methods.

Difference between Hard Candy Making Equipment and traditional method.

Hard Candy Press Machine

Combining different performances saves the trouble of going from one machine to another and from one process to the next, saving time and even more labor costs. It can save a lot of unnecessary processes, which makes the production more efficient.

Conventional Method

It requires manual monitoring and operation, and if there is a mistake that leads to the omission of a certain step, deviation in the ratio, and other problems, it can cause a loss to the company that is hard to ignore.

Hard Candy Machine is the result of our efforts to absorb and master the advanced process of the world's food processing companies through continuous efforts. We are always paying attention to the development of the market to make timely adjustments and updates, and always give you the best **Hard Candy Maker Machine**.
