

Customized 200kg/h Stepless Speed Adjustment Lollipop Making Machine

Specifications :

Payment Terms	L/C T/T Western Union
Keyword	Lollipop Making Machine,lollipop maker machine,small lollipop making machine

Detail Introduction :

Lollipop Making Machine

The **Lollipop Machine** is a special tool for lollipop production, which uses PLC programming to automatically control the temperature and time of vacuum boiling sugar. The program has been improved with a learning function, which can control the boiling temperature within plus or minus one degree of error, which can improve the quality of sugar paste and thus the quality of the lollipop.

Role of Lollipop Making Machine.

Role of Small Lollipop Making Machine.

1	Dedicated automatic PLC controlled vacuum film continuous boiling candy lollipop making line is a lollipop making machine.
2	Set machine, electricity, gas, control in one, reasonable and compact structure, with a high degree of automation, high production efficiency.
3	It can produce a wide range of lollipops such as single-color, two-flavor two-color spray flower, two-flavor two-color double layer, three-flavor three-color spray flowers as well as crystal candy, sandwich candy, article candy, xylitol sugar-free lollipop, and think kee lollipop.
4	The automatic stick insertion system of the Lollipop Maker Machine can realize the fully automatic operation of the whole line. The accuracy rate of the automatic stick insertion system can reach more than 99%, and after many improvements, the operation is more simple and convenient.
5	The whole production line is manufactured according to the food GMP standard, which makes it easy for food companies to pass professional certifications such as GMP, HACCP, and QS in the food industry.

Lollipop Stick Making Machine parameters and specifications.

Flat Lollipop Making Machine Specifications.	
Model	TG-GTC150
Theoretical output	150kg/h
Weight of lollipop	according to the type of lollipop candy
Lollipop diameter	according to lollipop type
Size of lollipop stick	60-100mm
Pouring speed	25-30n/min
Steam requirement	250kg/h 0.5-0.6Mpa
Compressed air requirement	0.6?/min 0.4-0.6Mpa
Working environment requirement	20-25? Humidity 55%
Temperature	
Overall power	18KW/380V
Overall length	17m
Overall weight	3500kg

Lollipop Candy Making Machine Process flow.

Sugar melting sugar storage ? vacuum microfilm ? cooling deposition ? sugar stick insertion ? lollipop forming ? demolding ? cooling ? packaging.

We have introduced a group of excellent technical professionals, supported by technology so that the **Lollipop Making Machine** is constantly upgraded, and the PLC human-machine interface and servo motor automation control system functions are more perfect. With high output, high accuracy, and good stability of continuous production, we are a good partner you can trust for a long time and look forward to cooperating with you!
