

# 200-300kg/h Easy Operating Compact Structure Small Lollipop Making Machine

## Specifications :

Payment Terms	L/C T/T Western Union
Keyword	small lollipop making machine,lollipop stick making machine,lollipop candy making machine

## Detail Introduction :

### Small Lollipop Making Machine

**Lollipop Making Machine** is suitable for producing all kinds of lollipops. The lollipops produced are smooth and bright in appearance and good in taste, which is favored by the customers. Small shape and compact structure; good operability; easy to adjust and control the pouring volume and speed; signal control system, easy to adjust and operate.

## Small Lollipop Making Machine information brief.

### Lollipop Maker Machine Information Introduction.

1	Automatic PLC control vacuum film boiling candy continuous pouring and molding line is the most advanced lollipop making machine in China.
---	--

2	The machine is integrated with machine, electricity, and gas control, with a reasonable and compact structure and a high degree of automation.
3	High production efficiency, can produce single-color lollipop, two-color, and two-flavor spray lollipop, two-color, and two-flavor double-layer lollipop, three-flavor and three-color spray lollipop, crystal candy, sandwich candy, striped candy, etc.
4	The produced candies have the characteristics of crystal smooth, clear spray painting stripes, accurate and stable sandwich amount and position, good taste, etc.

**Main features of Lollipop Candy Making Machine.**

1. Multi-purpose, suitable for pouring hard candy, lollipop, pear paste candy, gel fudge, toffee, and all kinds of pouring and molding candy.
2. Compact structure, stable performance, convenient control.
3. Pouring quantity can be selected, and the running speed can be steplessly adjusted according to the need.
4. Equipped with an automatic mold tracking detection device, no mold automatically stops pouring.
5. Adopt the control principle of program setting, which makes the machine smooth and accurate during the operation.
6. The working power is compressed air, the whole working environment is hygienic and clean, which meets the production requirements of food hygiene.

**Lollipop Machine advantages.**

**Lollipop Stick Making Machine advantages.**

The high degree of automation	The overall set of machines, electricity, gas, control in one, compact and reasonable structure, with a high degree of automation.
Accurate lollipop stick position	The accuracy rate can reach more than 99%, no off-stick, and leakage phenomenon.
Convenient operation	Equipped with developed automatic lollipop inserting system, which can realize fully automatic operation.
Safe and hygienic	Manufactured according to food GMP standards, making it easy for food companies to pass the food industry GMP, HACCP, QS, and other certifications.

Since our establishment, we have been committed to providing customers with cost-effective **Flat Lollipop Making machines**. With market development as our guide, we constantly introduce technical professionals and strive to develop and innovate, and win the praise of customers at home and abroad with **Small Lollipop Making Machine**. We hope to win together with you and look forward to your call!
