

High Efficiency Industrial Popping Boba Making Machine Popping Boba Maker

Specifications :

Payment Terms	L/C T/T Western Union
Keyword	popping boba making machine,automatic boba making machine,popping boba maker

Detail Introduction :

Popping Boba Making Machine

Popping Boba Making Machine is a great helper for making popping beads in milk tea. The different flavors and forming methods of popping beads can be customized according to customer needs, and different recipes produce a variety of popping bead flavors, so you can mix and match as you wish and enjoy anytime, anywhere.

Automatic Boba Making Machine components.

Automatic Boba Making Machine components.	
Name and Function	Parameters

Simmering System	400L
Mainly used for boiling juice liquid, sodium alginate liquid, and protective liquid.	
Cooling tank	500L
It is used to cool the boiled juice liquid, sodium alginate liquid, and protection liquid.	
Transfer pump	GP-1
Electric control box	-----
Mainly used to control the boiling system	
Forming unit	100~150kg/h ?4-8mm?
Forming unit	150~300kg/h ?8-15mm?
Conveying pipe	304SUS

Popping Boba Making Machine parameters.

Popping Boba Making Machine parameters.

Model	NC-199
Material	304 stainless steel/316 stainless steel, can be customized according to demand
Size	W1750*D1800*H2450MM
Cleaning	Automatic cleaning

Application area	Application to the production of cold sky crystal ball/popping beads
Popping beads	taste smooth, uniform, and full
Fault alert	SMS push notification
Forming method	round, oval, can be customized shape
Popping bead size	5-12mm can be customized and adjusted
Output	1-1.5T / H, can be customized according to demand
Main ingredients	carrageenan, sodium alginate, konjac gum, agar, etc., can be changed according to your recipe needs
Remote control	Mobile phone background control, remote switch table, remote reset

Popping Boba Machine functions and uses.

1. Adopt PLC control system, fully automatic design, in line with food hygiene standards
2. Combined with the production process of popping beads, the produced popping beads are bright in color, round and beautiful in appearance, and delicious in taste.
3. According to the production process, the popping beads are made of a combination of jam material liquid, solidifying liquid, and reserving liquid.
4. Made of 304 stainless steel, popping beads can be put in milk tea, ice cream, yogurt, and other hot and cold drinks, but also can do cake decoration, fruit salad, and so on, loved by many people.

Popping Boba Making Machine features.

Boba Maker Machine features.	No overall hygiene dead ends, safe and hygienic
	Can accept water washing, fast and convenient
	Stable output and high efficiency
	Automatic temperature control, saving manpower

Popping Boba Maker always pays attention to the changes in the market, automatic innovation, to create the most suitable for your desired **Popping Boba Making Machine**. we choose high-quality production of popping beads of raw materials and automated cloud linkage integration, small footprint, easy to operate, to give you a novel experience, sincerely welcome you to visit the guidance!
